

ملحق رقم (9)

مؤهلات وخبرات فريق العمل المطلوبة

Role	number of resources	experience	Description
Senior Backend-Developer	2	+4	<p>Senior developers are responsible for designing and implementing software platforms, programs, and applications. They are willing to challenge designs when efficiencies or errors are found to ensure that the best product is delivered. They also need to make sure that the code is tested with pre-developed test scripts prior to moving forward.</p> <p>Skills:</p> <ul style="list-style-type: none"> ● Full stack development experience for backend (Spring boot, Kafka, Camunda, Keycloak, Elasticsearch/Kibana, redis) ● Good knowledge of Event-Driven Architecture (EDA) ● Good knowledge of Java Design patterns. ● Experienced with Spring Framework and JPA. ● Experienced with Java. ● Good knowledge of Messaging queues. ● Core knowledge of caching. ● Experience with using Appium for test automation ● Experience in Unit Testing ● Core tool knowledge for SCM and CICD ● Problem-solving and critical thinking. ● Detail-oriented, to make sure that the code produced meets the user stories details ● Excellent oral and communication skills <p>Objectives:</p> <p>Senior developers should focus on six core areas: Building, Learning, Engaging, Scaling, and Improving, Coaching.</p> <p>Building: building highly consumable services that provide business value by using an outside-inside approach.</p> <p>Learning: researching and testing development best practices and applying these lessons.</p> <p>Engaging: proactively engaging colleagues across the digital value chain.</p>

			<p>Scaling: creating material to rapidly scale learning across the enterprise</p> <p>Improving: leveraging analytics to identify problems and share lessons learned with colleagues.</p> <p>Coaching: sharing and mentoring the colleagues' developers where he is improving the skills of new members and fresh experience.</p>
Senior automation engineer	1	+4	<ul style="list-style-type: none"> • Identifying and selecting the automation test cases • Applying various designs and documenting the automation test strategy • Creating an automation test plan and getting approval • Participating in Selenium Environment Setup with an Integrated Development Environment (IDE) • Automating the design of a framework • Implementing it as per the structure of the project • Creating, enhancing, debugging, and running the test cases • Collating and monitoring the defect management process • Managing the changes and executing regression tests • Coming up with exact solutions for problems related to object identity and error handling • Experience with using Appium
Angular Developer	1	+4	<p>As a lead developer, Angular Developer will be responsible for creating a top-level coding-base using Angular best practices. Your role will require you to implement an exciting and streamlined user experience in the form of a Java-based desktop and mobile web-app.</p> <p>To ensure success as an angular developer, you should have extensive knowledge of theoretical software engineering, be proficient in JavaScript, HTML, and CSS, and have excellent project management skills. Ultimately, a top-class angular developer can design and build a streamlined application to company specifications that perfectly meet the needs of the user.</p> <p>Angular Developer Responsibilities:</p> <ul style="list-style-type: none"> • Designing and developing user interfaces using angular best practices. • Adapting interface for modern internet applications using the latest front-end technologies. • Writing JavaScript, CSS, and HTML.

			<ul style="list-style-type: none"> • Developing product analysis tasks. • Form Builder framework experience • Making complex technical and design decisions for angular projects. • Developing application codes and unit tests in angular, Java Technologies, and Rest Web Services. • Experience with using Appium • Conducting performance tests. • Consulting with the design team. • Ensuring high performance of applications and providing support. <p>Angular Developer Requirements:</p> <ul style="list-style-type: none"> • Knowledge in Micro Frontends Architecture • Previous work experience as an angular developer. • Proficient in CSS, HTML, and writing cross-browser compatible code. • Knowledge of JavaScript MV-VM/MVC frameworks including AngularJS. • Excellent project management skills. <p>Proven experience implementing front-end and back-end JavaScript applications</p> <ul style="list-style-type: none"> • Excellent communication skills. • Critical thinker and good problem-solver.
Flutter Developer	1	+4	<p>Flutter Developer is responsible for the coding, innovative design and layout of our unique mobile applications.</p> <p>The ideal candidate will be responsible for conceptualizing and executing clear, quality code to develop innovative mobile applications on both iOS and android service. You will test your code, identify errors, and iterate to ensure quality code.</p> <p>Responsibilities</p> <ul style="list-style-type: none"> • Build and maintain highly scalable Web, iOS, and Android applications using flutter • Translate and Build the designs and Wireframes into high*quality responsive UI

			<ul style="list-style-type: none"> • Ensure the performance, quality, and responsiveness of applications. • Gather and refine specifications and requirements based on technical needs • Create and maintain software documentation • Stay plugged into emerging technologies/industry trends and apply them into operations and activities <ul style="list-style-type: none"> ○ *Cooperate with designers to match visual design intent <p>Job Requirements</p> <ul style="list-style-type: none"> • Solid understanding of mobile application design patterns. • Experience in publishing process on both play store & app store. • Excellent problem solving, analytical, and troubleshooting skills. • Have strong knowledge about mobile data patterns • Proficient understanding of Version Control Systems such as Git. • Experience with REST APIs • Basic understanding of how web services work. • Aggressive problem diagnosis and creative problem*solving skills • Strong organizational skills to juggle multiple tasks within the constraints of timelines and budgets with business acumen • Ability to work and thrive in a fast*paced environment, learn rapidly and master diverse web technologies and techniques. • Comfort using programming languages and relational databases • Experience with using Appium Flutter driver to allows developers and testers to easily test mobile Flutter apps with Appium. • Knowledge in Micro Frontends Architecture
System Admin	1	+4	<p>Roles and Responsibilities:</p> <p>design, build and implement cloud-native architectures with Kubernetes and related technologies for us.</p> <p>Responsible for overall Docker & Kubernetes setup, configuration and Architecture.</p> <p>Configuring and maintaining/ supporting a large scale Docker based environment using kubernetes.</p> <p>Troubleshoot and resolve issues within the Docker and kubernetes environment.</p> <p>Ensure proper operational aspects including monitoring, reporting, backup</p>

			<p>for both Docker hosts and associated images and containers.</p> <p>Help develop and maintain automated processes, tools, and documentation in support of Docker.</p> <p>Work with development teams to understand capacity and performance requirements & Define a deployment solution using container orchestration tools to ensure scalable and highly available solution.</p> <p>Assist Development teams to migrate applications to Docker based PaaS platform using Kubernetes.</p> <p>Requirements: Certifications such as CKA (Certified Kubernetes Administrator), CKAD (Certified Kubernetes Application Developer), Experience in creating and managing production scale Kubernetes clusters, Deep understanding of Kubernetes networking</p> <p>Support our Kubernetes based projects to resolve critical and complex technical issues</p> <p>Performing application deployments on Kubernetes cluster</p> <p>Securely managing kubernetes Cluster on at least one of the cloud providers (AWS, Azure or GCP cloud)</p> <p>Kubernetes core concepts</p> <p>Deployment, ReplicaSet, DaemonSet, Statefulsets, Jobs.</p> <p>Managing Kubernetes secrets</p> <p>Ingress Controllers (Nginx, Istio etc) and cloud native load balancers</p> <p>Managing Kubernetes storages (PV, PVC, Storage Classes, Provisioners)</p> <p>Kubernetes Networking (Services, Endpoints, DNS, LoadBalancers)</p> <p>Managing resource quotas</p> <p>Experience in setting up monitoring and alerting for Kubernetes cluster using open source monitoring tools like Grafana, Prometheus.</p> <p>Deeply engage with our stakeholders to understand their architecture and operations, and work to continuously improve their overall Kubernetes support experience.</p>
